

MAY 26 1978

Memo from

JOSHUA LEDERBERG

To:

June Tatum

MAY 26 1978

1' memoir on Ed.

June - This is a shorter version. There will be a longer one for NBS in due course.

I have been puzzled how or whether to deal with more personal matters and still do honest biography. As you can see this version all but evades that area except for a brief mention of the ironic tragedy of Viola's early death.

I did have in mind that your children should be proud of Ed's contributions to science and how he is remembered. Thank you for your help.
